

POSSIBLE ADDITIONS TO THE BIRD LIST THROUGH TO DECEMBER 31, 2024

The Park keeps adding species and there appear to be another 50 species that could be added in the future which would put the list at 353. This is NOT going to happen but I am listing the 50 species so you can see just how many we get (ten during 2022 and 13 in 2023). The species listed in red have been nominated by local birders

Species	Date Seen	Species	Date seen
Western Grebe		Acadian Flycatcher	9.9.22
Black-capped Petrel	10.4.23	Vermillion Flycatcher	2.2.22
Black-bellied Storm-Petrel		Western Kingbird	2.3.23
