

## FIVE RECORDS OR LESS AT TOM RENICK COUNTY PARK

The information detailed here is already given in the spreadsheet but not everyone sees or can access this document so I have created this separate table. Here is a list of all the species that were seen on five or fewer days since the start of the survey. It does create one problem if a single bird is seen on six days, then it does not appear on this list however as most sightings are for one day only it is of minor significance.
